FULL-TIME WORK EXPERIENCE

Software Engineer, adidas; Nuremberg, Germany — 08/17-Present

Adidas is the largest sportswear manufacturer in Europe.

- Research and introduce cutting edge technologies and methodologies into our automation processes to enhance our continuous delivery process
- Perform load tests and identify performance bottlenecks for the high consumer demand Hype Platform
- Leverage Elastic Search to implement internal order monitoring tools
- Enable continuous delivery of the eCOM Checkout flow through the implementation of automation scripts for functional and performance testing
- Develop with Node.js in the ecom Checkout API team using microservices architecture
- Develop with React in the ecom Checkout Payment team
- Collaborate with operations team to setup, run and monitor Large Volume Sales

Software Engineer, AMADEUS IT GROUP; Dubai, UAE — 03/15-07/17

Amadeus IT Group is a major IT provider for the travel and tourism industry.

- Implement customer CRs (change requests) and solved production bugs as reported by the customer or internally on the test systems
- Took ownership of releases from C&P (concept and planning) phase through specification writing, development, QA and UAT phases
- Implement changes for accessibility compliance
- Implement changes for PCI DSS compliance
- Develop internal team tools
- Lead the Responsive Revamp project

Software Engineer, URBANBUZ; Dubai, UAE — 09/14-02/15

UrbanBuz is a Dubai based startup providing a cloud based customer engagement and loyalty platform

- Implement new features in the Loyalty Platform
- Adopt the migration of the Loyalty Platform from Yii/PHP to Spring/Java

Software Engineer, GEOVISION; Beirut, Lebanon — 12/13-09/14

Geovision is a tech startup and regional leader specializing in providing Geographic Information Systems, Automatic Vehicle Location and Field Force Management and Dispatch solutions.

- Adopt the migration of a field force management system from the Windows smart device application platform to the Android and iOS platform. The environment used for development was the cross platform PhoneGap environment
- Implement an Android Native version of the previously described application

Software Engineer Traineeship, UBANQUITY; Beirut, Lebanon — 07/13-08/13

Ubanquity Systems Ltd. is an Irish tech startup offering eChannel solutions to banking corporations where I developed data mining applications to support the payment platform.
